

Thank you very much for participating in this community based Morepork monitoring!

Your assistance is greatly appreciated.

Do

- Record any owls that you hear during the week. The more records we have the better!
- Make sure you fill in your address details so we know where the monitoring occurred.
- Try and be as accurate as possible when recording the data. It's really important to get the time right. The distance and direction of the calls from where you are standing is probably the most critical part. Most phones have a GPS or compass component which can give you the direction if you are unsure. Or record where you think the owl is, if you know of a landmark.
- **We are particularly interested in observations which involve two or more owls in the same vicinity. Record the distances and direction of all owls heard separately on the datasheet. That is, use one box per owl.**

Don't

- Call to the Moreporks hoping to get a response. Doing this could really compromise our results, as well as unnecessarily disrupt breeding as the owls try to defend their territories.

Name:

Phone:

Address (where the monitoring occurred):

Time of Observation:	Date:
How many Moreporks did you detect?	Did you see or hear the Morepork? Or both?
How far away was it / they? (Approx)	Very Close Close Distant Very Distant (Under 50m) (50 – 100m) (100 – 200m) (200m +)
Are you able to provide a description, and / or a direction (N, S, E, W) of where you think the Morepork was in relation to where you made the observation?

Please return the completed survey to one of the designated drop boxes located in The Post Office Box room, Foodland Mall, the school, the Visitors Information Centre or Parks HQ

Thank you again for taking time to complete this survey.
